

glōPeel Prep

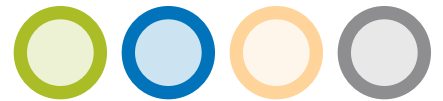

- Mission Statement** Prepares skin for a treatment by gently stripping oil and softening surface cells so that the chemical exfoliant can absorb and react more readily.
- Recommended For** All skin types and conditions.
- Active Interest**
Citric Acid - antioxidant that preserves the natural moisturizing factor
Gallic Acids - breaks up oil and inhibits tyrosinase
Witch Hazel - a plant extract that reduces skin irritation
D-cholic Acid - reduces sebum and improves absorption of other actives
Denatured Alcohol - astringent that dries oil
- glōComplex** **Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)**
- pH** 2.00
- Directions** See professional protocols
- Composition** Denatured Alcohol, Aqua (Distilled Water), Hamamelis Virginiana (Witch Hazel) Extract, Citric Acid, Gallic Acid, D-cholic Acid, Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
- Notes**
A patch test is highly recommended 24-48 hours prior to treatment.

Sun alert: this product may increase skin's sensitivity to sunlight.
A sunscreen is highly recommended.

Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
- Works well with** All glōtherapeutics chemical exfoliation products

Mission Statement	An exfoliant with fruit enzymes and salicylic acid to help break down dead cells for smoother skin. Promotes clarification to reduce oiliness for a clearer skin.
Recommended For	Dry, dehydrated, aging, sun damaged, hyperpigmentation, acne grades I & II
Active Interest	<p>5% Salicylic Acid - keratolytic BHA that smoothes and improves skin's texture with anti-acne and anti-irritant properties</p> <p>3% Bromelain - a protein digesting, skin smoothing pineapple enzyme</p> <p>1% Papain - a papaya enzyme that dissolves dead skin cells to promote a fresher skin</p> <p>Pomegranate Extract - source of Ellagic Acid that strengthens the cell membrane</p> <p>Cranberry Extract - antioxidant with antibacterial properties</p> <p>BioAstin™ (Astaxanthin) - powerful carotenoid antioxidant with anti-inflammatory properties that is derived from a Hawaiian microalgae</p>
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	3.38
Directions	See professional protocols.
Composition	Aqua (Distilled Water), Hamamelis Virginiana (Witch Hazel) Extract, Glycerin, Caprylic/Capric Triglyceride, Salicylic Acid, Bromelain, Stearic Acid, Papain, Cetyl Alcohol, Titanium Dioxide, Glycol Distearate, Dimethicone, Allantoin, Punica Granatum (Pomegranate) Extract, Vaccinium Macrocarpon (Cranberry) Extract, BioAstin™ (Astaxanthin), Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron), D-alpha-tocopherol, Xanthan Gum, Benzyl Alcohol, Fragrance Oils
Notes	<p>A patch test is highly recommended 24-48 hours prior to treatment.</p> <p>Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended.</p> <p>Color may shift over time due to air, light, and temperature exposure and the natural interaction of active interests.</p>
Works well with	<p>Retail products: glōConditioning collection, glōPurifying collection, glōRetinol CS, glōRenew Serum, glōSuper Serum, glōPeptide + Defense, glōEye Restore, glōProtecting SPF 30</p> <p>Professional products: All glōtherapeutics chemical exfoliation products</p>

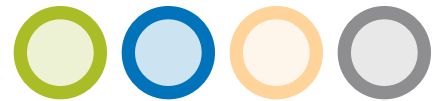

glōLactic 15%

Mission Statement	This product offers exfoliating and moisture retention properties and will promote softer, smoother skin, as well as improvements in the appearance of fine lines.
Recommended For	Aging, acne grades I & II, sun damaged, hyperpigmentation, dry, dehydrated skin
Active Interest	15% Lactic Acid - keratolytic AHA that smoothes skin and improves texture and is less irritating and drying Gluconic Acid - gentle exfoliant that is excellent on sensitive skin Blueberry Fruit Puree - rich in antioxidants and phytonutrients Bilberry Fruit Extract - antioxidant that helps strengthen capillaries with anti-inflammatory properties Morus Alba Root Extract (mulberry) - antioxidant and skin brightening properties
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	2.30
Directions	See professional protocols.
Composition	Aqua (Distilled Water), Vaccinium Angustifolium (Blueberry) Fruit Puree, L-lactic Acid, Xanthan Gum, Gluconic Acid, Benzyl Alcohol, Vaccinium Myrtillus (Bilberry) Fruit Extract, Morus Alba (Mulberry) Root Extract, Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron), Ammonium Hydroxide, Sodium Metabisulfite
Notes	A patch test is highly recommended 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
Works well with	Retail products: glōConditioning collection, glōBrightening Serum, glōBrightening Polish, glōRestorative Mask, glōRetinol CS, glōLightening Serum, glōPure Hydration, glōPeptide + Defense, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30 Professional products: glōPeel Prep, glōEnzyme, glōRestorative Mask

glōSalicylic 30%

Mission Statement	An antiseptic exfoliant that deeply cleanses pores. Excellent treatment for acne and aids in overall skin rejuvenation.
Recommended For	Acne grades I & II, mild rosacea, hyperpigmentation, rough skin
Active Interest	30% Salicylic Acid - keratolytic BHA that smoothes skin and improves texture with anti-acne and anti-irritant properties Totarol™ - a natural antioxidant botanical with antibacterial and anti-microbial properties Cranberry Extract - antioxidant with antibacterial properties BioAstin™ (Astaxanthin) - powerful carotenoid antioxidant with anti-inflammatory properties that is derived from a Hawaiian microalgae
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitrone)
pH	2.24
Directions	See professional protocols.
Composition	Ethanol, Salicylic Acid, Aqua (Distilled Water), Hamamelis Virginiana (Witch Hazel) Extract, Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitrone), Vaccinium Macrocarpon (Cranberry) Extract, Totarol™, BioAstin™ (Astaxanthin), Ammonium Hydroxide
Notes	A patch test is highly recommended 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests. A white precipitate representing crystallization may form around the rim of the bottle and on the skin within 30 seconds of application. This is not frosting.
Works well with	Retail products: glōPurifying collection, glōPure Hydration, glōRetinol CS, glōRenew Serum, glōEye Restore, glōProtecting SPF 30 Professional products: glōEnzyme, glōPeel Prep, glōGlycolic 30%/60%, glōTCA 10%/15%, glōCalming Seaweed Mask

glōGlycolic 30%

Mission Statement A chemical exfoliant to promote the repair and regeneration of skin. Recommended to aid in the elimination of actinic keratosis and improve the appearance of aging skin, uneven texture and tone.

Recommended For Aging skin, acne grades I & II, sun damaged, hyperpigmentation, ingrown hairs

Active Interest
30% Glycolic Acid - keratolytic AHA that smoothes skin and improves skin's texture
Phytic Acid - antioxidant that prevents lipid peroxidation
Citric Acid - antioxidant that preserves the natural moisturizing factor
Bilberry Fruit Extract - antioxidant that helps strengthen capillaries and has anti-inflammatory properties
Raspberry Fruit Extract - antioxidant with astringent and anti-inflammatory benefits

glōComplex **Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)**

pH 2.25

Directions See professional protocols.

Composition Aqua (Distilled Water), Glycolic Acid, Butylene Glycol, Ammonium Hydroxide, Vaccinium Myrtillus (Bilberry) Fruit Extract, Rubus Idaeus (Raspberry) Fruit Extract, Phytic Acid, Citric Acid, Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)

Notes A patch test is highly recommended 24-48 hours prior to treatment.

Sun alert: this product may increase skin's sensitivity to sunlight.
A sunscreen is highly recommended.

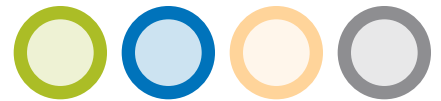

Color may shift over time due to air, light, and temperature exposure and the natural interaction of active interests.

Works well with Retail products: glōPurifying collection, glōSuper Serum, glōRetinol CS, glōRenew Serum, glōBrightening Serum, glōBrightening Polish, glōLightening Serum, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30

Professional products: glōEnzyme, glōPeel Prep, glōSalicylic 30%, glōModified Jessner, glōTCA 10%/15%, glōBrightening Polish

glōGlycolic 60%

Mission Statement	An aggressive chemical exfoliant that promotes the repair and regeneration of skin. Recommended to aid in the elimination of actinic keratosis and to improve the appearance of aging skin.
Recommended For	Aging skin, acne grades I & II, sun damaged, hyperpigmentation, ingrown hairs
Active Interest	60% Glycolic Acid - keratolytic AHA that smoothes skin and improves skin's texture Phytic Acid - antioxidant that prevents lipid peroxidation Citric Acid - antioxidant that preserves the natural moisturizing factor Bilberry Fruit Extract - antioxidant that helps strengthen capillaries and has anti-inflammatory properties Raspberry Fruit Extract - antioxidant with astringent and anti-inflammatory benefits
glōComplex	Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	2.00
Directions	See professional protocols.
Composition	Glycolic Acid, Aqua (Distilled Water), Ammonium Hydroxide, Butylene Glycol, Vaccinium Myrtillus (Bilberry) Fruit Extract, Rubus Idaeus (Raspberry) Fruit Extract, Phytic Acid, Citric Acid, Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
Notes	A patch test is highly recommended 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
Works well with	Retail products: glōPurifying collection, glōSuper Serum, glōRetinol CS, glōRenew Serum, glōBrightening Serum, glōBrightening Polish, glōLightening Serum, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30 Professional products: glōEnzyme, glōPeel Prep, glōSalicylic 30%, glōModified Jessner, glōTCA 10%/15%, glōBrightening Polish

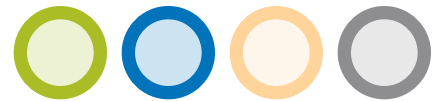

glōModified Jessner 14%

Mission Statement	A synergy of effective acids to help reduce the appearance of melasma, freckles, acne and mild cases of rosacea.
Recommended For	Aging skin, sun damaged, hyperpigmentation, acne grades I & II, mild rosacea
Active Interest	14% Lactic Acid - offers exfoliating and moisture retention properties to promote a softer smoother skin 14% Salicylic Acid - antiseptic keratolytic BHA that smoothes, improves skin's texture and has anti-acne and anti-irritant properties 14% Resorcinol - reduces hyperpigmentation and helps remove rough skin Resveratrol - an exceptional free radical scavenger that protects collagen structure Raspberry Fruit Extract - antioxidant, astringent and anti-inflammatory Lycopene - carotenoid antioxidant derived from tomatoes
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	2.00
Directions	See professional protocols.
Composition	Ethanol, L-lactic Acid, Salicylic Acid, Resorcinol, Resveratrol (Wine), Rubus Idaeus (Raspberry) Fruit Extract, Lycopene, Aqua (Distilled Water), Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
Notes	A patch test is highly recommended 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests. A white precipitate representing crystallization may form around the rim of the bottle and on the skin within 30 seconds to one minute of application. This is not frosting.
Works well with	Retail products: glōConditioning collection, glōPurifying collection, glōRetinol CS, glōLightening Serum, glōRenew Serum, glōBrightening Serum, glōBrightening Polish, glōRestorative Mask, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30 Professional products: glōEnzyme, glōPeel Prep, glōGlycolic 30%/60%, glōTCA 10%/15%, glōBrightening Polish, glōRestorative Mask

glōTCA 10%

Mission Statement	A chemical exfoliant to decrease the appearance of fine lines and surface imperfections, while promoting healthy looking skin.
Recommended For	Aging skin, sun damage, fine lines, uneven texture
Active Interest	10% TCA - trichloroacetic acid is a strong acid that creates a more aggressive treatment for wrinkles, surface imperfections and pigment discolorations Mandelic Acid - a larger molecule allows for sustained absorption and reduced irritation Phytic Acid - an antioxidant that prevents lipid peroxidation and provides the necessary acidity to skin Pyruvic Acid - antioxidant that helps synthesize amino acids
glōComplex	Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	2.00
Directions	See professional protocols.
Composition	Ethanol, Trichloroacetic Acid (TCA), Aqua (Distilled Water), L-mandelic Acid, Phytic Acid, Pyruvic Acid, Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron), Sodium Hydroxide
Notes	A patch test is highly recommended 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
Works well with	Retail products: glōConditioning collection, glōPurifying collection, glōSuper Serum, glōRetinol CS, glōPeptide + Defense, glōBrightening Serum, glōBrightening Polish, glōLightening Serum, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30 Professional products: glōEnzyme, glōPeel Prep, glōGlycolic 30%/60%, glōModified Jessner, glōRestorative Mask

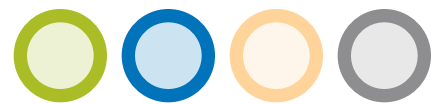

glōNeutralizer

Mission Statement	Antioxidant-infused to neutralize the acidity of a chemical exfoliant in order to slow or stop its reaction with the skin. Can be used in the event that excessive burning, discomfort or irritation is experienced.
Recommended For	All skin types and conditions
Active Interest	Calcium Carbonate - neutralizes skin EGCG (Epigallocatechin Gallate) - potent antioxidant derived from heart of green tea Shea Butter - strong protective capabilities against erythema and has a soothing effect
glōComplex	Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	8.00
Directions	See professional protocols.
Composition	Aqua (Distilled Water), Hamamelis Virginiana (Witch Hazel) Extract, Butyrospermum Parkii (Shea Butter), Glycerin, Calcium Carbonate, Epigallocatechin Gallate (EGCG), Phyllanthus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
Notes	Shake well before use. More than one application may be needed to completely neutralize. When the neutralizer is applied to the skin, there may be an initial tingling sensation. This is due to the pH change from the acid to the neutralizer that causes an exothermic response. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
Works well with	All glōtherapeutics chemical exfoliation products.

glōTCA 15%

Mission Statement	To improve the appearance of aging skin, smooth fine lines and enhance skin tone.
Recommended For	Sun damage, fine lines, aging, mature skin, hyperpigmentation, actinic keratosis
Active Interest	15% TCA (Trichloroacetic Acid) - used for medium depth peeling, minimal recovery time, may remove pre-cancerous growths, soften scar tissue and provide deep purification Kleptose® - assists in delivery and has tightening and firming benefits Vigna Aconitifolia Seed Extract (Vit-a-like™) - provides a similar performance as retinol by stimulating fibroblast activity and cell renewal Yogurt Extract - a probiotic that de-stresses the skin and weakens the bonds that hold dead skin cells together Phytic Acid - antioxidant that prevents lipid peroxidation and provides the necessary acidity to the skin Pyruvic Acid - antioxidant that helps synthesize amino acids
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	1.17
Directions	See professional protocols.
Composition	Alcohol Denat. (Ethanol), 15% Trichloroacetic Acid (TCA), Cyclodextrin, Glycerin, Vigna Aconitifolia Seed Extract, Sodium Citrate, Yogurt Extract, L-mandelic Acid, Phytic Acid, Pyruvic Acid, Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
Notes	This product is reserved for facilities with a physician on staff. A patch test is highly recommended at least 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
Works well with	Retail products: glōConditioning collection, glōPurifying collection, glōSuper Serum, glōRetinol CS, glōPeptide + Defense, glōBrightening Serum, glōBrightening Polish, glōLightening Serum, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30 Professional products: glōEnzyme, glōPeel Prep, glōGlycolic 30%/60%, glōModified Jessner, glōRestorative Mask

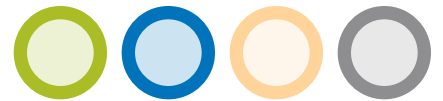

glōAlphaBeta 17%

Mission Statement	To refine surface texture and lessen the appearance of discoloration while clearing acneic disturbances.
Recommended For	Congested, oily, dry, hyperpigmentation, fine lines, sun damaged
Active Interest	17% Glycolic Acid - keratolytic AHA that smoothes skin and improves skin texture 17% Lactic Acid - increases water content, beneficial for hyperpigmentation and is less irritating than most acids 17% Salicylic Acid - dissolves cellular glue for purifying, antibacterial, anti-microbial benefits Rumex Occidentalis Extract (Tyrostat™) - natural skin brightener Tricholoma Matsutake Extract (Somgyii Mushroom) - modulates immune activity, evens out skin tone and reduces hyperpigmentation Rumex Occidentalis Extract (LipoBrite®) - non-irritating brightener that reduces skin redness and scavenges reactive oxygen species
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	1.53
Directions	See professional protocols.
Composition	Alcohol Denat. (Ethanol), 17% Glycolic Acid, 17% L-lactic Acid, 17% Salicylic Acid, Rumex Occidentalis Extract, Tricholoma Matsutake Extract, Ethoxydiglycol, Hydroxycinnamic Acid, Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron), Trisodium Ethylenediamine Disuccinate
Notes	This product is reserved for facilities with a physician on staff. A patch test is highly recommended at least 24-48 hours prior to treatment. Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended. Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.
Works well with	Retail products: glōConditioning collection, glōPurifying collection, glōPure Hydration, glōRetinol CS, glōRenew Serum, glōBrightening Serum, glōBrightening Polish, glōLightening Serum, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30 Professional products: glōEnzyme, glōPeel Prep, glōGlycolic 30%/60%, glōSalicylic 30%, glōBrightening Polish, glōRestorative Mask

Mission Statement	A combination treatment to enhance skin tone and texture while purifying blemish prone skin.
Recommended For	Acne, congestion, breakouts, fine lines, photodamaged, hyperpigmentation
Active Interest	<p>30% Glycolic Acid - keratolytic AHA that smoothes skin and improves skin texture</p> <p>10% TCA (Trichloroacetic Acid) - an aggressive acid for fine lines, surface imperfections and pigment discoloration</p> <p>10% Salicylic Acid - dissolves cellular glue for purifying, antibacterial, anti-microbial benefits</p> <p>Mushroom Extract - a pore tightening agent that contains amino acids and minerals to strengthen skin</p> <p>Neem Leaf Extract - enhances immune function and has antibacterial and antiseptic qualities</p> <p>Argania Spinosa Kernel Oil (Argan) - rich in poly-unsaturated fatty acids that preserves cell integrity and is a sebo-regulator</p>
glōComplex	Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron)
pH	1.03
Directions	See professional protocols.
Composition	Alcohol Denat. (Ethanol), 30% Glycolic Acid, 10% Salicylic Acid, 10% Trichloroacetic Acid (TCA), Glycerin, Xanthan Gum, Butylene Glycol, Fomes Officinalis (Mushroom) Extract, Azadirachta Indica (Neem) Leaf Extract, Argania Spinosa Kernel Oil, Phyllantus Emblica (Amla) Fruit Extract, L-carnosine, Niacinamide, Spin Trap (Phenyl Butyl Nitron), Trisodium Ethylenediamine Disuccinate, Sodium Hydroxide
Notes	<p>This product is reserved for facilities with a physician on staff.</p> <p>A patch test is highly recommended at least 24-48 hours prior to treatment.</p> <p>Sun alert: this product may increase skin's sensitivity to sunlight. A sunscreen is highly recommended.</p> <p>Color may shift over time due to air, light and temperature exposure and the natural interaction of active interests.</p>
Works well with	<p>Retail products: glōPurifying collection, glōPure Hydration, glōRetinol CS, glōRenew Serum, glōRefreshing Mist, glōEye Restore, glōProtecting SPF 30</p> <p>Professional products: glōEnzyme, glōPeel Prep, glōGlycolic 30%/60%, glōSalicylic 30%, glōBrightening Polish, glōRestorative Mask</p>
